

ETD Recreational Division Class Structure

Welcome to ETD's Recreational Division:

Our Recreational Division is ideal for dancers who want to explore the world of dance without committing to a major stage performance. This division is perfect for students looking to strengthen their technique, build their skills, or simply discover the joy of dance for the first time. Whether you're new to dance or seeking a more casual experience, our recreational classes provide a nurturing environment to explore your passion for movement.

The division is divided into two sessions: Fall (August-December) and Spring (January-May). Please note that although classes end in May, our Spring Observation will take place in the first week of June. Dancers are encouraged to participate in both sessions to gain the most benefit from the program. On average, our students dance for the entire 10 months.

Dancers in this Division:
